

# Fusion Narrate:

AI Assist - Generative AI

Fusion Narrate®  
Powered by nVoq™

## Generative AI for Healthcare Workflow Automation

Dolbey is at the forefront of speech recognition and workflow automation systems, with a focus on innovation driven by consistent user-guided updates and patented shortcut technologies. With AI Assist for Fusion Narrate, we're expanding into automation powered by artificial intelligence.

Speed and accuracy are essential for not only documentation, but all provider duties. AI Assist is an evolution in speech recognition and automation technology that offers an entirely new level of utility and productivity efficiencies, with limitless potential applications.

### Privacy and Security

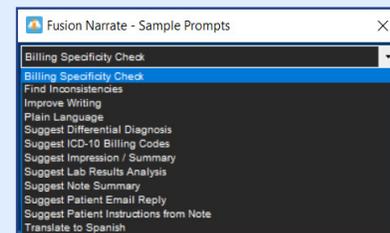

AI Assist harnesses the power of generative AI in a private, secure and HIPAA-compliant application.

## Task Automation Through AI-Powered Shortcuts

With AI Assist, Fusion Narrate users can integrate generative AI into their workflow to drastically improve productivity. AI Assist allows for text analysis, summarization, transformation, and generation.

AI Assist has many potential use cases and countless possibilities. With AI Assist, you can:

- ✓ **Generate a suggested impression and recommendation**
- ✓ **Summarize a report with a bulleted or numbered list**
- ✓ **Enhance the completeness of medical report documentation**
- ✓ **Analyze text and suggest ICD-10 billing codes**
- ✓ **Perform a quality check to discover inconsistencies or problems with a report**
- ✓ **Draft an email reply to a patient**

AI Assist offers high-value, targeted prompts out of the box to automate otherwise time-consuming tasks. Users can also enter custom prompts to build unique AI-driven workflows.

- ✓ **Translate a report or email reply to a different language**
  - ✓ **Create a patient-friendly version of a report**
- ...and achieve much more!**
