

The Rugged Telehealth Kit (RTK) brings a new dimension to providing telemedicine. RTK is a fully mobile telemedicine platform with a built-in military-grade ruggedized tablet with readable, glove capable Gorilla Glass for video conferencing in any condition. Network connectivity is achieved using a Cradlepoint connection for 3G/4G/LTE or built-in WiFi.

### The Rugged Telehealth Kit is ideal for these scenarios:

- Emergency Response
- Disaster Relief
- Homebased Patient Care
- Rural Healthcare Outreach

### Compatible devices include:

- Exam Camera
- Vitals Monitor
- Stethoscope
- Ultrasound

RTK stores an array of cameras and medical devices in a rugged, impact-, dust-, and weather-resistant rolling case.
